

## **TENNIS DESCRIPTION**

Tennis is a very emblematic sport that is recognized all over the world and there are names like Roger Federer or Rafael Nadal that even those who do not know or follow the sport have probably heard of them.

Tennis at IITH is considerably challenging. We have a mud clay court. It's the most tough surface of all due to its variable bounce and slow nature of the court. The fact that everyone here has a unique style, it makes playing even more fun and interesting. Accordingly, all have had a delightful experience playing tennis at IITH.

Synthetic courts will be constructed by October.
